DISCUSSION PAPER SERIES NO. 2014-29 (Revised)

The *PIDS Discussion Paper Series* constitutes studies that are preliminary and subject to further revisions. They are being circulated in a limited number of copies only for purposes of soliciting comments and suggestions for further refinements. The studies under the *Series* are unedited and unreviewed.

The views and opinions expressed are those of the author(s) and do not necessarily reflect those of the Institute.

Not for quotation without permission from the author(s) and the Institute.

REVIEW AND ASSESSMENT OF PROGRAMS OFFERED BY STATE UNIVERSITIES AND COLLEGES

Rosario G. Manasan
Danileen Kristel C. Parel

Executive Summary

This study aims (i) to review and assess the programs being offered by State Universities and Colleges (SUCs) vis-à-vis their mandates, the courses being offered by other SUCs in the region, and the quality of graduates produced, and (ii) given the findings, to recommend courses of action to improve the relevance and quality of course offerings of the SUCs.

Program Offerings vis-à-vis Mandates. A review of the mandates of the various SUCs in the Philippines indicates that the Charters of most SUCs allow them to offer programs outside of their *core* mandates. Thus, it is not surprising to see many SUCs offering programs outside of their core mandates.

Program Duplication. Given the broad mandates of SUCs, it is not surprising that there is substantial duplication in their program offerings relative to those of PHEIs and other SUCs in the same region where they operate. The duplication rate is generally higher when computed based on total enrollment rather than on total number of programs offered. On the average, the program duplication rate for the SUCs covered under this study varies from 54%-57% if computed based on total number of program offerings and 89%-92% if computed based on total enrollment. Moreover, high rates of program duplication appeared to be associated by an increase in the number of programs offered by SUCs during the period. Thus, about 80% of the SUCs covered by this study are found to have increased the number of programs they are offering in 2005-2011.

While some SUC officials raised the view that the number of programs that SUCs offer and program duplication among SUCs and PHEIs are non-issues, program duplication may be considered a problem for at least two reasons. One, the number of programs offered by SUCs has been found empirically to tend to increase per student cost of SUCs (Manasan 2011). Two, when SUCs offer programs that PHEIs traditionally offer, PHEIs are effectively crowded out because the tuition fees charged by SUCs are significantly lower than that of PHEIs.

Moreover, PHEI officials lament not so much the competition but the fact that the competition is unfair. Many PHEI officials report that while the CHED strictly enforces its Policies, Standards and Guidelines (PSGs) on PHEIs, the same rules are not applied as strictly on SUCs with detrimental impact on quality of graduates.

Quality of Instruction. The quality of instruction in Philippine higher education has remained stagnant at a low level over the years. To wit, the median passing rate for 38 PBEs for which we have data for 2005-2011 ranged from 40% to 48% during the period. Also, only 10 out of these 38 PBEs had average passing rates above 60% and only 6 had passing rates above 70%.

In the aggregate, the weighted passing rate of all SUCs combined in all the PBEs taken together is 4%-9% lower than the national passing rate in 2004-2011. During this period, the passing rate of SUCs was below that of PHEIs in 15 out of 36 PBEs for which there is data while the opposite is true in the other 21 PBEs. In contrast, the passing rate of SUCs was better than that of PHEIs in 21 out these 36 PBEs. In 4 out of these 21 PBEs (namely, customs administration,

geodetic engineering, midwifery, and nursing), SUCs improved their advantage further during the period. However, the edge that SUCs used to enjoy in the early part of the period has been eroded in 12 of these 21 PBEs, namely, accountancy, aeronautical engineering, civil engineering, criminology, electrical engineering, electronics engineering, library science, mechanical engineering, medical technology, physical therapy, social work and veterinary medicine. More worrisome is the preponderance of SUCs/ PHEIs with zero passing rate in many PBEs in 2004-2011. Furthermore, closer scrutiny of SUCs' passing rate in PBEs indicate that a good number of them post passing rates that are well below the national average passing rate year after year.

Recommendations. To help rationalize program offerings of SUCs and improve quality of instruction, it is recommended that CHED enforces more vigorously its policy of closing existing programs of SUCs and PHEIs alike where these HEIs' performance is under par year after year. Given the persistent poor performance of some satellite campuses of SUCs, the CHED should also consider applying this rule to satellite campuses independently of main campuses.

There is also a need to improve CHED's ability to ensure that SUCs' program offerings comply with its Policies, Standards and Guidelines (PSGs) for these programs. The FGDs conducted under this study indicate that these PSGs have not always been strictly enforced in the case of SUCs because there appears to be a lack of clarity on the supervisory and regulatory powers of the CHED on SUCs. Some CHED regional officials say that CHED law (Republic Act 7722) gives the CHED supervisory and regulatory powers over all higher education institutions, including SUCs. However, other CHED regional officials admit that CHED has difficulty applying the same standards on SUCs because of the so-called "autonomy" that their Charters vest on SUCs.

Who is responsible for monitoring SUCs compliance with the PSGs? There appears to be some ambiguity in the official issuances of the CHED as to which unit is tasked to monitor SUCs compliance with the PSGs. CMO No. 17, s2009 provides that the evaluation/ assessment of the proposed program offerings of SUCs be highly centralized at the Office of Programs and Standards at the CHED central office (as per CMO No. 17, s2009). On the other hand, CMO 30, s2009 appears to imply that the CHED regional office is tasked to monitor and ensure the effective application of the MORPHE on SUCs. To resolve this uncertainty, the CHED has to weigh the advantages/ disadvantages of centralization over decentralization with respect to the monitoring of SUCs.

Who is responsible for enforcing compliance of SUCs to the PSGs? CHED's Strategic Plan for 2011-2016 states that "in the case of SUCs, the Commissioners who sit as Chairmen of the SUCs' Board of Trustees/ Regents shall ensure that SUCs' program offerings meet set standards." However, the FGDs conducted under this study suggest that the Commissioners who sit as Chairmen of the SUCs' Board have not always been successful in carrying out this task. It is not clear whether the Commissioners have not been sufficiently briefed regarding the findings of the monitoring of SUCs' compliance to the PSGs or whether they have not been able to sufficiently influence the discussion in the Board. SUC officials and CHED regional officials note that the Commissioner has only one vote in the Board. A suggestion made during the FGDs to make the CHED regional director a regular member of the SUCs' Board is worth considering.

Issue of incentives. The FGDs also indicate that offering of programs that are popular or in-demand is seen by a number of SUC officials as a form of income generating project (IGP). Note that increased enrollment is likely to lead to higher subsidy from the national government

because the NG subsidy is basically driven by enrollment. Moreover, higher enrollment also results in higher income from student fees other things being equal.

In order to correct for this unintended consequence of the normative funding formula, there is a need to adjust the formula so that SUCs do not get an additional subsidy from the national government for the additional enrollment resulting from their offering popular programs. That is, SUCs may be allowed to offer popular programs provided they meet CHED standards and provided they shoulder the full cost of doing so.

Improving quality of instruction. Some of the measures that some SUCs currently implement to improve their passing rate in PBEs (like the conduct of review classes and the administration of pre-board examinations where non-passers are not given certification needed to take the PBE) may improve the passing rate but will not necessarily uplift the quality of instruction. The more effective measures to improve quality of instruction based on evidence available to date include faculty development and facilities upgrading.

REVIEW AND ASSESSMENT OF PROGRAMS OFFERED BY STATE UNIVERSITIES AND COLLEGES

Rosario G. Manasan
*Danileen Kristel C. Parel*¹

1. INTRODUCTION

The state universities and colleges (SUCs) in the Philippines have always been a major issue mainly because of the poor quality of education most offer, undeveloped management and financial systems, and inequality of access. And yet the government has been providing considerable funding support for the said entities with the most recent allocation amounting to P26 billion in FY 2012, primarily because of the importance of tertiary education in promoting human development and improving the economy's competitiveness.

The first zero-based budgeting (ZBB) study conducted on the SUCs cited the following major findings: (1) duplication of programs; (2) inefficiencies in the allocation of funds for SUCs; and (3) low quality of graduates as indicated by low passing rates in professional licensure examinations. Among the recommendations made is the formulation of an action plan to address the duplication of programs and the low quality of graduates. Major efforts are now being formulated and implemented by the Commission on Higher Education (CHED) in partnership with the SUCs presidents and other stakeholders to address these concerns. The present study will complement those efforts and focus on the review and assessment of the quality and efficiency of the programs being offered by the SUCs, especially the major/lead universities.

Objectives of the study. The study aims (i) to review and assess the programs being offered by SUCs vis-à-vis their mandates, the courses being offered by other SUCs in the region, and the quality of graduates produced, and (ii) given the findings, to recommend courses of action to improve the relevance and quality of course offerings of the SUCs.

Methodology. In order to assess the extent of program duplication in the higher education sector and to provide an indicator of the possible crowding out of private higher education institutions (HEIs) by SUCs, the present study analyzed the distribution of programs being offered by SUCs and the distribution of enrollment across these various programs in relation to (i) the core mandate of each SUC, (ii) the programs being offered by other SUCs, and (iii) the programs being offered by private HEIs. So as to better understand the various factors that contribute to the decisions of SUCs to expand their program offerings beyond what is dictated by their mandates, the study conducted focus group discussions (FGDs) and key informant interviews with SUCs officials, and regional officials of the Commission on Higher Education (CHED) and the National Economic and Development Authority (NEDA).

On the other hand, the quality of the various program offerings of SUCs and PHEIs nationwide were reviewed in terms of the passing rate of their graduates in professional board examinations (PBEs). A comparison of the distribution of the PBE passing rate of SUCs and private HEIs for the various programs they offer will also be undertaken in this study in order to assess their relative contribution to the overall quality of higher education in the country.

¹ The authors wish to acknowledge the contributions of Janet S. Cuenca in organizing focus group discussions in selected regions and the research assistance of Ma. Laarni D. Revilla and Reinier T. de Guzman.

2. ASSESSMENT OF PROGRAMS OFFERED BY SUCs IN SELECTED REGIONS

2.1. Program Offerings vis-à-vis Mandates

SUCs which are not faithful to their core mandates. A review of the mandates of all the SUCs in the Philippines indicates that a significant number of SUCs (38% of the total number of SUCs) have not been faithful to their core mandates.² Thus, at least 40% of the total number of programs offered by these SUCs in 2010 are outside of their core mandates. This may be attributed to a number of factors: (i) some SUCs have limited mandates as per their respective Charters; and (ii) a large number of SUCs are allowed by their Charters to offer programs that are outside of their core mandates.

The Charters of some SUCs only allow them to offer a limited number of programs. Thus, it is expected that a large proportion of their programs are outside their mandate. For example, Tarlac State University (**Appendix Table 3c**), Basilan State College (**Appendix Table 10b**), Carlos C. Hidalgo Memorial State College (**Appendix Table 7c**), and Sulu State College (**Appendix Table 16a**), have more than 80% of their programs outside of their core mandates. Similarly, more than 70% of the programs of Quirino State College (**Appendix Table 2b**), Batanes State College (**Appendix Table 2b**), and Cotabato City State Polytechnic College (**Appendix Table 13a**), and Mindanao State University in Region XII (**Appendix Table 13b**) and around 60% of the programs of the Zamboanga State College of Marine Sciences and Technology (**Appendix Table 10b**), Adiong Memorial Polytechnic State College (**Appendix Table 16a**), Pampanga Agricultural College (**Appendix Table 3d**), and Mindanao State University campuses in Region IX (**Appendix Table 10a**), Region X (**Appendix Table 11b**), and ARMM (**Appendix Table 16**) are outside of their core mandate. Finally, more than 50% of the programs offered by other SUCs, such as University of Rizal (**Appendix Table 4c**), Marinduque State College (**Appendix Table 5b**), Camarines Sur Polytechnic College (**Appendix Table 6b**), Eulogio “Amang” Rodriguez Institute of Science and Technology (**Appendix Table 14b**), Marikina Polytechnic College (**Appendix Table 14c**), Kalinga Apayao State College (**Appendix Table 15b**), Zamboanga State College of Marine Science and Technology (**Appendix Table 10b**), Davao Oriental State College of Science and Technology (**Appendix Table 12a**), and Central Mindanao University (**Appendix Table 11b**), are also not part of their core mandates as provided by their respective charters.

On the other hand, the Charters of many SUCs allow them to offer programs that are outside of their core mandates. For instance, the Charter of the Negros Oriental State University or NORSU (whose core mandate is almost all encompassing to start with) allows it to offer other degrees within its areas of specialization and according to its capabilities as the *Board of Regents may deem necessary to carry out its objectives, particularly to meet the needs of the Province of Negros Oriental and the region.*

Likewise, the Charter of the University of Rizal System (RA 9157) allows it to offer programs in *all fields deemed relevant to the development foals of the Province of Rizal.* Furthermore, Misamis Oriental State College of Agriculture and Technology, as mandated by Batas Pambasa Blg. 402, provides that the school may offer *courses as may be necessary to meet national and regional needs for trained manpower.* University of Southern Mindanao, as per PD 1312, is also allowed to offer *other courses needed in the socio-economic development of Mindanao.*

² The term “core mandate” is used in this paper to refer to the specific mandate or specialization of any given SUC that is explicitly stated in its Charter.

Similarly, the Charters of a number of SUCs allow them to offer *other courses as the Board of Trustees may deem necessary*. Such SUCs include Siquijor State College (RA 7947), Tiburcio Tancinco Memorial Institute of Science and Technology (Batas Pambansa 304), Cagayan State University (PD 1436), Philippine Normal University (RA 7168), Tarlac College of Agriculture (PD 609), Palawan State University (RA 7818), Mindoro State College of Agriculture and Technology (RA 8007), Camarines Norte State College (RA 7352), Dr. Emilio B. Espinosa, Sr. Memorial State College of Agriculture and Technology (RA 7945), Iloilo State College of Fisheries (PD 1523), Northern Iloilo Polytechnic State College (Batas Pambansa Blg. 500), Northern Negros State College of Science and Technology (RA 8448), Western Visayas College of Science and Technology (Batas Pambansa Blg. 395), University of Eastern Philippines (RA 4126), Davao del Norte State College (RA 7879), University of Southeastern Philippines (Batas Pambansa Blg. 12), Agusan Del Sur State College of Agriculture (RA 7932), Surigao State College of Technology (RA 8650), Benguet State University (PD 2010), Abra State Institute of Science and Technology (Batas Pambansa Blg. 392), Cotabato Foundation College of Science and Technology (Batas Pambansa Blg. 408), Basilan State College (PD 1943), Western Philippines University (RA 9260), Negros Oriental State University (RA 9299), Cebu Technological University (RA 9744), Eastern Samar State University (RA 9312), Eastern Visayas State University (RA 9311), Naval State University (RA 9718), Samar State University (RA 9313), Northwestern Mindanao State College of Science and Technology (RA 9146), Sultan Kudarat State University (RA 9966), Northern Mindanao State Institute of Science and Technology (Batas Pambansa Blg. 241), Surigao Del Sur State University (RA 9998), and Central Bicol State University of Agriculture (RA 9717).

Furthermore, other SUCs are allowed by their Charters to offer *other relevant and/or related fields*. Such SUCs include Ilocos Sur Polytechnic State College (RA 8547), Sorsogon State College (RA 7666), Cebu Normal University (RA 8688), Apayao State College (RA 8563), Mountain Province State Polytechnic College (RA 7182), Adiong Memorial Polytechnic State College (RA 8651), North Luzon Philippines State College (PD 10084), Bataan Peninsula State University (RA 9403), Southern Luzon State University (RA 9395), Romblon State University (RA 9721), Catanduanes State University (RA 10229), Negros State College of Agriculture (RA 9141), University of Antique (RA 9746), Bohol Island State University (RA 9722), Jose Rizal Memorial University (RA 9852), Bukidnon State University (RA 9456), Camiguin Polytechnic State College (RA 7923), Ifugao State University (RA 9720), Nueva Viscaya State University (RA 9272), Batanes State College (RA 9314), Quirino State College (Batas Pambansa Blg. 440), Bataan Polytechnic State College (RA 8562), Bulacan State University (RA 7665), Don Honorio Ventura Technological State University (RA 9832), Nueva Ecija University of Science and Technology (RA 8612), Ramon Magsaysay Technological University (RA 8498), Batangas State University (RA 9045), Cavite State University (RA 8468), Laguna State Polytechnic University (RA 9402), Aklan State University (RA 9055), Capiz State University (RA 9273), Leyte Normal University (RA 7910), Northwest Samar State University (RA 9719), Southern Leyte State University (RA 9261), Visayas State University (RA 9158), Zamboanga City State Polytechnic College (RA 9142), Caraga State University (RA 9854), Western Mindanao State University (PD 1427), and Josefina H. Cerilles State College (RA 9159).

Thus, it is not surprising to see many of these SUCs offering programs outside of their core mandates. Specifically, over 80% of the programs offered by Iloilo State College of Fisheries (**Appendix Table 7d**), and Western Visayas College of Science and Technology (**Appendix Table 7e**), and around 70% of the programs offered by Quirino State College (**Appendix Table 2b**), Tarlac State University (**Appendix Table 3c**), Cebu Normal University (**Appendix Table 8b**), Abra State Institute of Science and Technology (**Appendix Table 15a**), Ifugao State University prior to its conversion to a university in 2009 (**Appendix Table 15a**), are outside of its mandates. Similarly, over 60% Northern Mindanao State Institute of Science and Technology

before its conversion to Caraga State University (**Appendix Table 17a**), and Surigao State College of Technology (**Appendix Table 17b**), and more or less 50% of the programs offered by the Pangasinan State University (**Appendix Table 1a**), Palawan State University (**Appendix Table 5a**), Mindoro State College of Agriculture and Technology (**Appendix Table 5b**), Tarlac College of Agriculture (**Appendix Table 3e**), Cebu Technological University (**Appendix Table 8a**), Northern Iloilo Polytechnic State College (**Appendix Table 7d**), Leyte Normal University (**Appendix Table 9c**), Cotabato Foundation College of Science and Technology (**Appendix Table 13a**), Apayao State College (**Appendix Table 15a**), Adiong Memorial Polytechnic State College (**Appendix Table 16**), are also outside of their core mandate.

SUCs which are faithful to their core mandate. A small number of SUCs (32% of the total number of SUCs) have been faithful to their mandates. In 2010, 80%-100% of the program offerings of these SUCs are within their core mandate. This may be explained by a number of factors: (i) the mandate of some SUCs are broad and encompassing to start with; and (ii) xxx..

Among the SUCs covered under this study, Negros Oriental State University (NOrSU) has perhaps the broadest mandate of all. As per its Charter (Republic Act 9299 of 2003), it shall offer undergraduate and graduate studies in the fields of arts and sciences, philosophy, literature, mass communication, teacher education, agriculture and forestry, fishery, engineering and architecture, maritime education, industrial and information technology, hotel, and restaurant management, tourism, public health, criminology, volcanology/geology, public administration, business and accountancy, law, medicine and nontraditional courses. Thus, it is not surprising to see that 100% of its program offerings and of its total enrollment are in programs that are within its core mandate in 2010 (**Table 1**).

Table 1. Percentage distribution of programs offered and total SUC enrollment vis-à-vis its mandate, NOrSU, 2005-2011

	Negros Oriental State University					
	2005/06	2006/07	2007/08	2008/09	2009/10	2010/11
<u>Programs offered</u>						
<i>Inside the Mandate</i>	100.00	100.00	100.00	100.00	100.00	100.00
<i>Outside the Mandate</i>	0.00	0.00	0.00	0.00	0.00	0.00
<i>Total Number of Programs</i>	68	63	66	62	62	67
<u>Enrollment in programs offered</u>						
<i>Inside the Mandate</i>	100.00	100.00	100.00	100.00	100.00	100.00
<i>Outside the Mandate</i>	0.00	0.00	0.00	0.00	0.00	0.00
<i>Total Enrollment</i>	13745	13253	14473	14473	14473	17807

On the other hand, a good number of SUCs have amended their Charters in recent years in such a manner as to expand their mandates. For instance, Jose Rizal Memorial State University (JRMSU), upon its conversion from a state college to a state university (Republic Act 9852 of 2009), is also considered to be one of the top SUCs with the broadest mandate. As a state college, it shall offer undergraduate and graduate courses in the field of education, engineering, arts and sciences. Upon its conversion to a state university, it was then mandated to offer courses in the field of arts and sciences, philosophy, literature, mass communication, teacher education, agriculture and forestry, fishery, engineering and architecture, maritime education, industrial and information technology, hotel and restaurant management, tourism, medicine, nursing and allied health sciences, criminology, geology, public administration, business and accountancy, law and nontraditional courses. In addition to its core mandate which is almost all encompassing, it is

also allowed to offer other relevant fields of study. Thus, the proportion of programs offered by JRSU increased from only 73% in 2009-2010 to 100% in 2009-2011. In like manner, the proportion of its students who are enrolled in the programs that is within its core mandates increased from 42% and in 2008-2009 to 100% in the succeeding years (**Table 2**).

Table 2. Percentage distribution of programs offered and total SUC enrollment vis-à-vis its mandate, JRMSU, 2005-2011

	Jose Rizal Memorial State University					
	2005/06	2006/07	2007/08	2008/09	2009/10	2010/11
Programs offered						
<i>Inside the Mandate</i>	77.78	76.09	76.47	72.73	100.00	100.00
<i>Outside the Mandate</i>	22.22	23.91	23.53	27.27	0.00	0.00
Total	45	46	51	44	53	54

Total Enrollment	3704	5318	4881	4431	4717	5170

Similarly, Southern Luzon State University (SLSU), which was converted to a university in 2007 by Republic Act 9395 of 2007, has expanded its mandate to offer graduate and undergraduate and short-term technical courses in the fields of allied medicine, education, engineering, agriculture, fisheries, forestry, environment, arts and sciences, accountancy, cooperative, business and entrepreneurship, technology. Hence, the programs offered and enrollment in programs offered within the core mandates have increased from only 20% and 12% in 2006-2007 to 100% in the succeeding years (**Table 3**).

Table 3. Percentage distribution of programs offered and total SUC enrollment vis-à-vis its mandate, SLSU, 2005-2011

	Southern Luzon State University					
	2005/06	2006/07	2007/08	2008/09	2009/10	2010/11

Total Enrollment	7026	6964	7784	9547	9908	10391

In like manner, with the conversion of the Central Visayas State College of Agriculture, Forestry and Technology (CVSCAFT) into the Bohol Island State University (BISU) through Republic Act 9722 in 2009, its mandates were expanded and was then allowed to offer courses in the fields of allied medicine, education, engineering, agriculture, fisheries, environment, arts and science, accountancy, cooperative, business and entrepreneurship, technology and other relevant fields of study. Thus, the proportion of programs offered by BISU within its core mandate rose from 71% in 2008-2009 to 94% in 2009-2010. In like manner, the proportion of its students who

were enrolled in programs within its core mandate increased from 57% in 2008 to 96% in 2009-2010 (**Table 4**).

Table 4. Percentage distribution of programs offered and total SUC enrollment vis-à-vis its mandate, BISU, 2005-2011

Total Enrollment	4839	4957	4791	6473	8346	9557

Likewise, the conversion of the Surigao del Sur Polytechnic State College (SSPSC) into Surigao Del Sur State University (SDSSU) as per Republic Act 9998 of 2010, resulted in the significant broadening of its mandates. As a university, it was then mandated to offer undergraduate, graduate and post-graduate programs and short-term courses in the fields of agriculture and environment studies, fishery, marine biology, marine transportation, engineering, forestry, industrial technology, education, law, medicine, nursing, midwifery and other health-related programs, information technology, arts and sciences, public administration, business administration and other business courses, and other degree courses. Thus, the proportion of programs offered by SDSSU within its core mandate rose from 30% in 2008-2009 to 100% thereafter. In like manner, the proportion of its students who are enrolled in programs within its core mandate increased from 24% in 2008-2009 to 100% in the succeeding years (**Table 5**).

Table 5. Percentage distribution of programs offered and total SUC enrollment vis-à-vis its mandate, SDSSU, 2005-2011

	Surigao del Sur Polytechnic University

<i>Outside the Mandate</i>	70.03	69.84	69.84	75.51	0.00	0.00
Total Enrollment	4337	4622	4622	4692	5693	6540

The examples cited above are by no means exhaustive. Other SUCs which have expanded their core mandates include Don Honorio Ventura Technological State University upon its conversion from an arts and trades college (**Appendix Table 3a**), Romblon State University upon its conversion from a state college (**Appendix Table 5a**), Cebu Technological University upon its conversion from Cebu State College of Science and Technology (**Appendix Table 8a**), Naval

State University upon its conversion from Naval Institute of Technology (**Appendix Table 9**), Northwest Samar State University after its conversion from Tiburcio Tancinco Institute of Science and Technology and merging with Samar State College of Agriculture and Forestry (**Appendix Table 9b**), Bukidnon State University after its conversion from a state college (**Appendix Table 11a**), Mindanao University of Science and Technology after its conversion from a polytechnic state college (**Appendix Table 11a**), and Sultan Kudarat State University after its conversion from a polytechnic state college (**Appendix Table 13a**). Because of this, there has been a significant increase in the proportion of programs and enrollments in programs within their core mandates.

In contrast, a few SUCs remain faithful to their core mandate. Take for example Davao del Norte State College. Despite being allowed to offer other courses upon the approval of the Board of Trustees, 100% of its program offerings are within its core mandates (**Appendix Table 12a**). The Philippine Merchant Marine Academy, similarly, only offers programs within its core mandates (**Appendix Table 3e**), while other SUCs such as Philippine State College of Aeronautics (PhilSCA), Technological University of the Philippines (TUP), Philippine Normal University (PNU), and Polytechnic University of the Philippines (PUP) maintain a high percentage of course offerings within their core mandates. Specifically, PhilSCA campuses in Region IV-A (**Appendix Table 4a**) and Region VII (**Appendix Table 8b**) remain faithful to its core mandates, while the PhilSCA campuses in Region III (**Appendix Table 3d**) and NCR (**Appendix Table 14c**) maintain relatively high programs within their core mandates. Similarly, TUP campuses in Region IV-A (**Appendix Table 4d**) and Region VI (**Appendix Table 7b**) remain faithful by having 100% of its program offerings within their mandates, while their campuses in NCR (**Appendix Table 14a**) still maintain more than 70% of its offerings within its mandates. Likewise, PNU campuses in Region II (**Appendix Table 2b**), Region IV-A (**Appendix Table 4d**) and Region VI (**Appendix Table 7a**) maintain 100% of its offerings within their core mandates while PNU campuses in the NCR (**Appendix Table 14b**) and CARAGA (**Appendix Table 17b**) maintain 70% of its program offerings within its core mandates. Finally, all programs offered by the PUP campuses in Region IV-B (**Appendix Table 5b**) and V (**Appendix Table 6b**), while more than 90% of the program offerings of its other campuses (**Appendix Tables 14a, 3b, and 4d**), are within its core mandates. Other SUCs which have relatively high offerings of programs within their core mandates include Visayas State University (**Appendix Table 9c**), Don Honorio Ventura Technological State University (**Appendix Table 3a**), Rizal Technological University (**Appendix Table 14 b**) and Nueva Ecija University of Science and Technology (**Appendix Table 3b**).

2.2. Program Duplication

In order to have a better perspective on the extent of program duplication, this paper looked at the program offerings of each SUC in all the regions in the Philippines. It then classifies the programs offered by each SUC into the following categories: (i) programs that are unique to the SUC under study, (ii) programs that are offered by the given SUC and any one of the other SUCs but are not offered by PHEIs in the region, (iii) programs that are offered by the given SUC and any one of the PHEIs but are not offered by any one of the other SUCs in the region, and (iv) programs that are offered by the SUC and any one of the other SUCs and one of the PHEIs in the region. This paper then argues that program duplication exists whenever the SUC under study offers programs that are not unique to it, i.e., SUC program offerings that fall under categories (ii), (iii) and (iv) above are said to duplicate programs offered by other SUCs and PHEIs in the region.

Given the broad mandates of SUCs, it is not surprising that there is substantial duplication in their program offerings relative to those of PHEIs and other SUCs in the same region where they

operate. Over 76% of all the SUCs in the Philippines registered duplication rates (computed based on number of programs offered) that are upwards of 75% in 2011. The duplication rate is generally higher when computed based on total enrollment rather than on total number of programs offered. Thus, 96% of all SUCs exhibited duplication rates (computed based on enrollment) that are upwards of 75% in 2011.

Table 6 summarizes the extent of program duplication of SUCs covered under this study. On the average, the program duplication rate for the SUCs covered under this study varies from 54%-57% if computed based on total number of program offerings and 89%-92% if computed based on total enrollment. On the average, the SUCs in Region VII posted the highest duplication rate – 73%-82% if computed based on total number of program offerings and 96%-98% if computed based on total enrollment. On the other hand, ARMM had the lowest program duplication rate among the SUCs, i.e. 15%-17% if computed based on total number of program offerings and 63%-65% if computed based on total enrollment.

Moreover, high rates of program duplication appeared to be associated with an increase in the number of programs offered by SUCs during the period. Specifically, around 80% of the SUCs are found to have increased the number of programs they are offering from 2005- 2011. In contrast, the program offerings of a few SUCs exhibited some decline during the period, notably: Don Mariano State University (**Appendix Table 18a**), Ramon Magsaysay Technological University (**Appendix Table 20b**), Batangas State University (**Appendix Table 21a**), Negros Oriental State University (**Appendix Table 25b**), University of the Philippines-Tacloban (**Appendix Table 26d**), Basilan State College (**Appendix Table 27b**), University of the Philippines- Mindanao (**Appendix Table 29-b**), Cotabato City State Polytechnic College (**Appendix Table 30a**), Philippine Normal University in NCR (**Appendix Table 31b**), University of the Philippines- Baguio (**Appendix Table 32b**).

Program duplication - a non-issue? In the focus group discussions with SUCs representatives in the selected regions, some SUC officials (e.g., from UPLB, PUP, TUP, NORSU) raised the view that the number of programs that SUCs offer and program duplication among SUCs and PHEIs are non-issues. They opined that attention should rather be focused on increasing budgetary support to SUCs so as to support an important goal of SUCs – to provide access and equity. Related to this, one of the SUC officials in the regional FGDs argued for the need to consider the geographic characteristic of the region when assessing the issue of program duplication among HEIs. He noted that duplication may be necessary when a region is composed of island provinces.

When the shoe is on the other foot. Surprisingly, while some SUC officials think that duplication of programs across SUCs and PHEIs is not an issue, other SUC officials in the regions think that the existence of branches of national universities (e.g., UP, PUP, TUP, PNU) in the regions tend to give rise to undue competition to the SUCs in the said regions. These officials say the same is true with respect to the presence of a branch/ extension class of a regional SUC in a region that is outside of its original catchment area.

Why is program duplication an issue? Program duplication is an issue from two perspectives. First, the number of programs offered by SUCs has been found empirically to tend to increase per student cost of SUCs (Manasan 2011). SUC size or enrollment size and proportion of faculty with advanced degrees were also found to have statistically significant influence on per student cost of SUCs.

Table 6a. Percent distribution of SUC program offering vis programs offered by other HEIs in selected region, 2005-2011

	Region 1						Region 2						Region 3					
	2005/06	2006/07	2007/08	2008/09	2009/10	2010/11	2005/06	2006/07	2007/08	2008/09	2009/10	2010/11	2005/06	2006/07	2007/08	2008/09	2009/10	2010/11

Second, FGDs with PHEIs indicate that program duplication is a problem from the point of view of these institutions. On the one hand, PHEI officials point out that when SUCs offer programs that PHEIs traditionally offer, PHEIs find it difficult to compete against SUCs in attracting students because of the low tuition that SUCs charged. That is, students tend to migrate to SUCs. Thus, SUCs effectively crowd out PHEIs. Also, although CHED provides scholarships/ financial assistance that allow students to enroll in the school of their choice, the support value of these programs is generally low relative to tuition charged by PHEIs. Thus, PHEIs remain unaffordable to students despite the presence of scholarships and financial assistance programs.

On the other hand, many PHEI officials decry what they perceive to be a double standard in the regulation and monitoring of SUCs and PHEIs by CHED. Thus, they say the playing field in the higher education sector is very uneven. PHEI officials report that CHED strictly enforces its Policies, Standards and Guidelines (PSG) on PHEIs.³ In contrast, they point out that some SUCs are allowed to offer courses despite the fact that said SUCs do not have the requisite facilities and qualified faculty.⁴

Some CHED regional officials say that CHED law (Republic Act 7722 of 1994) gives the CHED supervisory powers over all higher education institutions, including SUCs. On the other hand, other CHED regional officials admit that CHED has difficulty applying the same standards on SUCs because of the so-called “autonomy” that their Charters vest on SUCs. This state of affairs is said to have a detrimental impact on quality of instruction in the SUC sector.

Factors HEIs consider in opening new programs. There are formal procedures that SUCs and PHEIs alike appear to follow in opening new programs. SUC and PHEI officials report that they conduct a feasibility study to assess the relevance of the program, market demand, faculty expertise, and availability of facilities. The proposal to offer a new program, which is initially prepared by the department that wishes to do so, then passes through several layers of review, first going to the college, then the university academic committee and finally the Board of Trustees/ Regents. After the proposal is approved by the Board, non-autonomous PHEIs then have to secure CHED approval. In comparison, CHED’s role in approving the opening of new programs in SUCs is not quite as clear as earlier alluded to.

Greater clarity in this area is critical given the political pressure that some SUCs face in offering new programs. For instance, some SUC officials report that at times they offer new programs in response to the demand of their stakeholders, including parents/ community, SUCs administrators themselves, and local politicians. One of the SUCs in the Visayas pointed out that in the past they offered a course (nursing) even if it is clear that said program is outside the SUC’s mandate and area of competence at the behest of local politicians. On the other hand, a SUC official from Mindanao also related that a SUC president can sometimes be replaced if he resists such outside pressure.

Surprisingly, offering programs that are popular or in-demand is seen by a number of SUC officials as a form of income generating project (IGP). This is so because increased enrollment implies not only increased NG subsidy because the NG subsidy is basically driven by enrollment⁵ but also greater income from student fees even if tuition fees remain unchanged. These officials say that it is their way of coping with the decline in subsidies from the national government following the introduction of the normative funding formula.

³ The PSGs are internationally benchmarked standards that are meant to ensure that Philippine higher education programs are comparable to international standards.

⁴ Discussions with HEI officials suggest that this is especially true of satellite campuses.

⁵ The normative funding formula provides a minimum amount per student and incremental amounts per student enrolled in higher priority programs.

Coping with declining enrollment in certain programs. HEI officials report that when enrollment in certain programs decline continuously, they seldom close a program. Instead, they shelve or freeze it. Nonetheless, such an event causes some adjustment. A PHEI official from Region IV-A narrated that faculty retrenchment becomes unavoidable at times.

In the public sector, SUCs typically redeploy faculty in programs with dwindling enrollment to programs with high enrollment. Oftentimes, this results in a poor match in expertise of the redeployed faculty with requirements of the high enrollment programs and re-tooling is needed or else quality of instruction suffers. At other times, redeployment of faculty is not required because some faculty members are part-time lecturers who do not hold plantilla items.

2.3. Quality of Instruction

The overall average passing rate in professional board examinations (PBEs) of SUCs has remained low over the years. In particular, the weighted average passing rate for all SUCs combined for 36 PBEs for which we have data for 2004-2011 ranged from 31% to 37% during the period if the University of the Philippines (UP) is excluded (**Table 7**). Furthermore, only 9 out of these 36 PBEs had average passing rates above 60% and only 3 have passing rates above 70%.

During this period, the passing rate of SUCs (net of UP) was below that of PHEIs in 15 out of 36 PBEs for which there is data while the opposite is true in the other 21 PBEs. In contrast, SUCs (net of UP) perform better than PHEIs in 21 out these 36 of PBEs (or 58%). SUCs have been able to improve their advantage further relative to PHEIs in the last 6 years in 4 out of these 21 PBEs where SUCs have an edge over PHEIs (namely, customs administration, geodetic engineering, midwifery, and nursing). However, the edge that SUCs used to enjoy in the early part of the period has been eroded in 12 out of these 21 PBEs including accountancy, aeronautical engineering, civil engineering, criminology, electrical engineering, electronics engineering, library science, mechanical engineering, medical technology, physical therapy, social work and veterinary medicine.

But perhaps more worrisome than the persistently low overall average passing rate in PBEs is the preponderance of SUCs (and PHEIs) with zero passing rate in many PBEs in 2004-2011. That is, when SUCs and PHEIs are classified as to their passing rates in the PBEs, the most number of SUCs/ PHEIs tend to fall in the zero passing rate category. This is the true for both SUCs and PHEIs in the case of the PBE for agriculture (**Figure 1**) and accountancy (**Figure 2**). A similar picture is also evident in the case of the PBE for chemistry (**Appendix Figure 1**), criminology (**Appendix Figure 2**), electrical engineering (**Appendix Figure 3**), electronics engineering (**Appendix Figure 4**), geodetic engineering (**Appendix Figure 5**), social work (**Appendix Figure 6**), elementary education (**Appendix Figure 7**), secondary education (**Appendix Figure 8**), library science (**Appendix Figure 9**), forestry (**Appendix Figure 10**), and environmental planning (**Appendix Figure 11**). In contrast, a disproportionately large number of HEIs falling in the zero passing rate category is not as much a problem for SUCs as in PHEIs in the PBEs for chemical engineering (**Appendix Figure 12**), civil engineering (**Appendix Figure 13**), and mechanical engineering (**Appendix Figure 14**), and marine transportation (**Appendix Figure 15**).

Closer scrutiny of the SUCs' passing rate in PBEs indicate that a good number of them post passing rates that are well below the national average passing rates over time. **Table 8** shows that a fairly large number of SUCs have passing rates below the national passing, while **Table 9**

documents the SUCs that have zero passers in various PBEs for at least three years in 2004-2011.

Table 7. Average passing rates in Professional Board Examinations, All HEIs, 2004-2011

	Average Passing Rate- SUCs ¹								Ratio of SUC Passing Rate to National Average Passing Rate

*revised 30 October 2014		

More specifically, **Table 10** which presents the passing rate in the Licensure Examination for Teachers in secondary education of SUCs (including their satellite campuses) also illustrates this point well. It shows that a number of SUCs, namely Abra State Institute of Science and Technology, Adiong Memorial Polytechnic State College, Apayao State College, Basilan State College, Batanes State College, Bicol University, Bukidnon State University, Bulacan Agricultural State College, Camiguin Polytechnic State College, Capiz State University, Caraga State University, Catanduanes State College, Cotabato City State Polytechnic College, Cotabato Foundation College of Science and Technology, Dr. Emilio B. Espinosa, Sr. Memorial State College of Agriculture and Technology, Eastern Samar State University, Eastern Visayas State University, Ilocos Sur Polytechnic State College, Iloilo State College of Fisheries, Isabela State University, Josefina H. Cerilles State College, Laguna State Polytechnic University, Naval State University, Negros Oriental State University, Northern Iloilo Polytechnic State College, Northern Negros State College of Science and Technology, Northwest Samar State University, Nueva Ecija University of Science and Technology, Occidental Mindoro State College, Palompon Institute of Technology, Romblon State University, Samar State University, Southern Philippines Agriculture, Business, Marine and Aquatic School of Technology, Sultan Kudarat State University, Sulu State College, Surigao Del Sur State University, Surigao State College of Technology, Tawi-Tawi Regional Agricultural College, University of Eastern Philippines, Zamboanga City State Polytechnic College, and Zamboanga State College of Marine Sciences and Technology all having passing rates that are not higher than 75% of the national average passing rates in five consecutive years during the period 2004-2011.

Similarly, other SUCs record passing rates lower than 75% of the national average at least five years during the same period, although not consecutively. Take for example Agusan Del Sur State College of Agriculture and Technology, Camarines Norte State College, Don Honorio Ventura Technological State University, Eulogio "Amang" Rodriguez Institute of Science and Technology, Jose Rizal Memorial State College, Kalinga-Apayao State College, Northwestern Mindanao State College of Science and Technology, Philippine State College of Aeronautics and Southern Leyte State University.

Furthermore, the table also underscores the differential performance of main campus and its satellite campuses. Thus, an average SUC passing rate that is above that national average does not necessarily guarantee that the passing rates of the individual campuses making up said SUC are performing as well. Related to this, a number of SUC officials lament how the satellite campuses have pulled down their performance in PBEs primarily because of the lower level quality of faculty and poorer facilities in the satellite campuses. While this is true of a number of SUCs, one can find many counter-examples as well.

Specifically, Bataan Peninsula State University, Batangas State University, Benguet State University, Bohol Island State University, Don Mariano Marcos Memorial State University, Mariano Marcos State University, Palawan State University, Philippine Normal University, Polytechnic University of the Philippines, Southern Luzon State University, West Visayas State University, and Western Visayas College of Science and Technology, all have passing rates that are above the national average in its entirety in 2004-2011. In addition, Carlos Hidalgo Memorial State College, Cebu Technological University, Ifugao State University, Mindanao State University, Mindoro State College of Agriculture and Technology, Pangasinan State University, University of Rizal System, Visayas State University, and Western Mindanao State University have passing rates that are 80% of the national average or better in 2004-2011. However, despite the good performance of these SUCs as a whole, some of their satellites posted sub-par performance during the same period.

In contrast, there are instances when the main campus of the SUC does not perform as well as its satellite campuses. For instance, the main campus of Technological University of the Philippines, although performing better than the national average, is still outperformed by its satellite campuses. The same is true with Cebu Technological University, Don Mariano Marcos Memorial State University, Ifugao State University, Mariano Marcos State University, Mindanao State University, Palawan State University, Polytechnic University of the Philippines, University of Antique, University of Rizal System, and the University of the Philippines, where, despite performing at par or better than the national average, still have at least one satellite campus performing better than the main campus.

Similarly, other SUCs which post sub-par performances as a whole have satellite campuses which outperform their main campuses. Specifically, the main Capiz State University does not perform as well as five of its satellite campuses, while the main campus of Pangasinan State University underperformed compared to four of its satellites. The same is true with Isabela State University, Eastern Visayas State University, Southern Leyte State University, Ilocos Sur Polytechnic State College, Iloilo State College of Fishries, Jose Rizal Memorial State College, Laguna State Polytechnic University, Mountain Province State Polytechnic College, Naval University, Negros Oriental State University, Northern Iloilo Polytechnic State College, Philippine State College of Aeronautics, and Surigao Del Sur State University, where their main campuses do not perform as well as at least one of their satellite campuses.

This finding appears to resonate with the HEI participants in the FGDs. Several SUC officials say that they do recognize the need to upgrade facilities and improve faculty capability but are unable to do so because of resource constraints. They also report that some of their faculty are part-time lecturers who do not have the advance degrees required of tenured faculty members.

HEI officials who participated in the FGDs conducted under this study also point out that two of the key factors that influence passing rates in PBEs are the admission and retention policies. By allowing the school to pre-select the students who are better prepared for higher education and to retain only those students who perform consistently during the course of their stay in the university (i.e., by ensuring that the university/ college has better material to work with), these policies obviously contribute to their good performance in PBEs. SUC officials note, however, that because their commitment to access and equity goals of public HEIs, they opt for open admissions and lenient retention policies. It also begs that the following question be asked: what are the minimum performance standards that HEIs should be expected to comply with? Are HEIs not giving students and their parents false hopes if they accept students who they do not expect to perform up to standards after graduation. This discussion underscores the need to measure the value added of HEIs to the knowledge, skills and productivity of students.

Admittedly, the passing rate in PBEs is not a sufficient measure of quality of instruction. One, graduates of many courses/ programs are not required to take PBEs. Two, many experts point out that employability and trainability are the acid test of the quality of instruction in higher education institution. Others further break this down into: (i) good communication skills, (ii) problem solving skills, and (iii) critical thinking skills. They further note that PBEs are not necessarily good in tracking down these skills among graduates of HEIs. However, because employability is not easy to track, passing rate in PBEs is oftentimes used as a proxy measure of quality of instruction in HEIs. Nonetheless, these points highlight the need for graduate tracer studies on a more regular basis.

Manasan (2011) analysed the determinants/ correlates of PBE passing rates. The most robust determinants of PBE passing rates were found to be the quality of faculty as measured by the proportion of the faculty with advanced degrees and the presence of Centers of Excellence and/or Centers of Development in the SUC.

3. CONCLUSION AND RECOMMENDATIONS

A review of the mandates of the various SUCs in the selected regions covered by this study indicates that the mandates of a number of SUCs (as spelled out in their Charters) are fairly broad to start with. But beyond this, the Charters of most SUCs allow them to offer programs outside of their *core* mandates. Thus, it is not surprising to see many SUCs offering programs outside of their core mandates.

Given the broad mandates of SUCs, it is not surprising that there is substantial duplication in their program offerings relative to those of PHEIs and other SUCs in the same region where they operate. Over 70% of all the SUCs in the Philippines and for which there is data registered duplication rates (computed based on number of programs offered) that are upwards of 75% in 2005-2011. The duplication rate is generally higher when computed based on total enrollment rather than on total number of programs offered. On the average, the program duplication rate for the SUCs covered under this study varies from 78%-81% if computed based on total number of program offerings and 92%-94% if computed based on total enrollment. Moreover, high rates of program duplication appeared to be associated by an increase in the number of programs offered by SUCs during the period. Thus, around 80% of the SUCs covered by this study are found to have increased the number of programs they are offering in 2005-2011.

While some SUC officials raised the view that the number of programs that SUCs offer and program duplication among SUCs and PHEIs are non-issues, program duplication may be considered a problem for a number of reasons. One, the number of programs offered by SUCs has been found empirically to tend to increase per student cost of SUCs (Manasan 2011). Two, when SUCs offer programs that PHEIs traditionally offer, PHEIs are effectively crowded out because the tuition fees charged by SUCs is significantly lower than that of PHEIs.

Moreover, PHEI officials lament not so much the competition but the fact that the competition is unfair. Many PHEI officials report that while the CHED strictly enforces its Policies, Standards and Guidelines (PSG) on PHEIs, the same rules are not applied as strictly on SUCs. Thus, they observe that some SUCs are allowed to offer courses despite the fact that said SUCs do not have the requisite facilities and qualified faculty.

There appears to be a lack of clarity on the supervisory and regulatory powers of the CHED on SUCs. Some CHED regional officials say that CHED law (Republic Act 7722) gives the CHED supervisory and regulatory powers over all higher education institutions, including SUCs. However, other CHED regional officials admit that CHED has difficulty applying the same standards on SUCs because of the so-called “autonomy” that their Charters vest on SUCs.

At the same time, the quality of instruction in Philippine higher education has remained stagnant at a low level over the years. To wit, the median passing rate for 38 PBEs for which we have data for 2004-2011 ranged from 40% to 48% during the period. Also, only 10 out of these 38 PBEs had average passing rates above 60% and only 6 had passing rates above 70%.

Although SUCs perform better than PHEIs in over 84% of PBEs, SUCs have been able to improve their advantage further relative to PHEIs in the last 7 years in about 31% of the PBEs where SUCs have an edge over PHEIs but the edge that SUCs used to enjoy in the early part of the period has been eroded in over 69% of these PBEs. But perhaps more worrisome than the persistently low overall average passing rate in PBEs is the preponderance of SUCs/ PHEIs with zero passing rate in many PBEs in 2004-2011. Furthermore, closer scrutiny of SUCs’ passing rate in PBEs indicate that a good number of them post passing rates that are well below the national average passing rate year after year.

To help rationalize program offerings of SUCs and improve quality of instruction, it is recommended that CHED enforces more vigorously its policy of closing existing programs of SUCs and PHEIs alike where these HEIs' performance is under par year after year. Given the persistent poor performance of some satellite campuses of SUCs, the CHED should also consider applying this rule to satellite campuses independently of main campuses.

There is also a need to improve CHED's ability to ensure that SUCs' program offerings comply with its Policies, Standards and Guidelines (PSGs) for these programs. On paper at least, CHED's policy on this matter appears clear and well-laid out. CHED Memorandum Order (CMO) No. 30, Series of 2009 provides that the Manual of Regulations on Private Higher Education (MORPHE) of 2008 (as laid out in CMO No. 40, Series of 2008) to SUCs and Local Universities and Colleges (LUCs) mandates all SUCs and LUCs to comply with its provisions. At the same time, CMO No. 17, Series of 2009 directed SUCs to ensure that the degree programs they offer comply with the PSGs. It also directs SUCs Presidents to submit all proposals related to the opening of new programs, revision of curriculum and establishment of extension programs to the Office of the CHED Chairman prior to the submission to the Governing Board. It further provides that CHED's Office of Programs and Standards will conduct the evaluation/ assessment of the proposed program offering to ensure compliance with the PSGs and that the SUCs Governing Board shall not approve the opening or offering of degree programs without the recommendation of the CHED.

However, the FGDs conducted under this study indicate that these PSGs have not always been strictly enforced in the case of SUCs. Thus, it is apparent that there is a need for greater clarity in CHED's supervisory and regulatory authority over SUCs.

Who is responsible for monitoring SUCs compliance with the PSGs? On the one hand, the evaluation/ assessment of the proposed program offerings of SUCs is highly centralized at present as it is supposed to be done by the Office of Programs and Standards at the CHED central office (as per CMO No. 17, s2009). On the other hand, while CMO 30, s2009 does not explicitly state which unit in CHED is tasked to monitor and ensure the effective application of the MORPHE on SUCs, it is implied by CMO No. 40, s2008 that it is the CHED regional office which will do this as it is the CHED regional office which takes on this responsibility in the case of private higher education institutions. Note that the application of the MORPHE on SUCs involves not just the evaluation and assessment of *proposed* program offerings but also the monitoring and enforcement of the PSGs with respect to *existing* program offerings of SUCs. Apparently, it is this ambiguity in the official issuances of the CHED which gives rise to the confusion in the field. Thus, the ability of CHED's regional offices to monitor SUCs' compliance to the PSGs has been patchy at present. To resolve this uncertainty, the CHED has to weigh the advantages/ disadvantages of centralization over decentralization with respect to the monitoring of SUCs.

Who is responsible for enforcing compliance of SUCs to the PSGs? CHED's Strategic Plan for 2011-2016 states that "in the case of SUCs, the Commissioners who sit as Chairmen of the SUCs' Board of Trustees/ Regents shall ensure that SUCs' program offerings meet set standards." However, the FGDs conducted under this study suggest that the Commissioners who sit as Chairmen of the SUCs' Board have not always been successful in carrying out this task. It is not clear whether the Commissioners have not been sufficiently briefed regarding the findings of the monitoring of SUCs' compliance to the PSGs or whether they have not been able to sufficiently influence the discussion in the Board. SUCs officials and CHED regional officials note that the Commissioner has only one vote in the Board. Related to this, it should be noted that CHED regional director likewise sits as a non-voting member (i.e., observer/ resource

person) in the SUCs' Board. In this regard, CHED regional officials say that their opinions are not always sought during the Board meetings. A suggestion made during the FGDs to make the CHED regional director a regular member of the SUCs' Board is worth considering.

Issue of incentives. As discussed above, the FGDs also indicate that offering of programs that are popular or in-demand is seen by a number of SUC officials as a form of income generating project (IGP). Note that increased enrollment is likely to lead to higher subsidy from the national government because the NG subsidy is basically driven by enrollment. Moreover, higher enrollment also results in higher income from student fees other things being equal.

In order to correct for this unintended consequence of the normative funding formula, there is a need to adjust the formula so that SUCs do not get an additional subsidy from the national government for the additional enrollment resulting from their offering popular programs. That is, SUCs may be allowed to offer popular programs provided they meet CHED standards and provided they shoulder the full cost of doing so.

One of the SUCs in Visayas revealed that when it was pressured to offer Nursing when the course was very much in demand, they did so but charged higher tuition per unit for the course compared to the tuition per unit charged for their other programs. Officials of the SUC narrate that when the program had to be downsized later on, the adjustment cost was not as difficult.

Improving quality of instruction. During the FGDs, SUC officials relate some of the measures they have implemented to improve their passing rate in PBEs. These measures include the conduct of review classes and the administration of pre-board examinations where non-passers are not given certification needed to take the PBE. Many of these measures will certainly improve the passing rate but will not necessarily improve or uplift the quality of instruction. The more effective measures to improve quality of instruction based on evidence available to date include faculty development and facilities upgrading.
