Notes: Additional variable definitions based on V-Dem V.10: *Class exclusion civil liberties*: Social class inequality with respect to civil liberty, negative index value from -4 (most equal) to 4 (most unequal); *Unequal access to public services/state jobs/state business*: Access distributed by socio-economic position, negative index value from -4 (most equal) to 4 (most unequal), available from 1900; *Class exclusion index*: Exclusion by socio-economic group, composite index based on the variables above and *political exclusion of the poor*, from 0 (most equal) to 1 (most unequal), available from 1900; *Educational equality*: Equality of access to high quality basic education, from -4 (unequal) to 4 (equal), available from 1900; *State ownership of economy*: Degree of state control over important sectors of the economy, from -4 (strong state control) to 4 (weak state control); *Binary democracy measure*: Indicator variable, equal to one for democratic. Data available online at <https://doi.org/10.23696/vdemds20>. Further sources: *Significant earthquake*, *volcanic eruption*: Indicator variables, equal to one if a significant earthquake or volcanic activity was recorded, based on data from the National Geophysical Data Center/World Data Service, available online at <https://doi.org/10.7289/V5TD9V7K>.
