SOEP Survey Papers

Series D - Variable Description and Coding

SOEP – The German Socio-Economic Panel Study at DIW Berlin

2013

SOEP 2012 – Documentation of Person-related Variables on Children in \$KIND for SOEP v29

SOEP Group

Running since 1984, the German Socio-Economic Panel Study (SOEP) is a wide-ranging representative longitudinal study of private households, located at the German Institute for Economic Research, DIW Berlin.

The aim of the SOEP Survey Papers Series is to thoroughly document the survey's data collection and data processing.

The SOEP Survey Papers is comprised of the following series:

Series A – Survey Instruments (Erhebungsinstrumente)

Series B – Survey Reports (Methodenberichte)

Series C – Data Documentations (Datendokumentationen)

Series D – Variable Descriptions and Coding

Series E – SOEPmonitors

Series F – SOEP Newsletters

Series G – General Issues and Teaching Materials

The SOEP Survey Papers are available at
<http://www.diw.de/soepsurveypapers>

Editors:

Prof. Dr. Gert G. Wagner, DIW Berlin and Technische Universität Berlin

Prof. Dr. Jürgen Schupp, DIW Berlin and Freie Universität Berlin

General information

The variables from the annual \$KIND files described in the following are not based on answers provided by the children themselves, but by answers to the household questionnaire provided by the respondent within the household (head of household). This data is re-aggregated on the person level and saved as child-specific entries in the file \$KIND.

The annual \$KIND datasets also contain additional information on institutional care and school attendance for children and young people; in selected waves, questions on costs of childcare as well as on non-institutional care arrangements are also asked (these variables are not described here). However, if questions regarding institutional care or costs of child care are modified, a description is included in this documentation.

The entries in \$KIND are identifiable with the codes “20 to 25” in the wave-specific variable \$NETTO (in the file PPFAD) or the code “2” in the variable \$NETOLD.

In addition to the variables described in this documentation, variables on specific topics that are not surveyed every year are an important part of the data stored in the files \$KIND. At the end of this documentation tables containing information on variables that are asked every other year are included. These tables include a reference for each variable regarding its longitudinal format in KIDLONG.

\$KIND: wave designation \$ = A BC

Survey year 1984-2012

1 Variables

1.1 SAMPEL

Note this variable is no longer included in \$KIND.

Information regarding sample membership can be found in the variable **PSAMPLE** in the file PPFAD. Information on nationality is provided by the wave-specific dataset \$PGEN and the generated variable **NATION\$\$**.

Var label: **sample membership**

Value label:

- (1) German household head
- (2) Turkish household head
- (3) Yugoslavian household head
- (4) Greek household head
- (5) Italian household head
- (6) Spanish household head

Waves: A-D

Comment: Sample membership for head of household based on his/her nationality. Code 1 is for Sample A (West German, without household heads who belong to Sample B), codes 2 to 6 constitute Sample B. This data is not time-dependent.

1.2 \$HERFAS

Note this variable is no longer included in \$KIND.

Var label: **foreign language version of the questionnaire**

Value label:

- (1) German (West)
- (2) Turkish
- (3) Yugoslavian
- (4) Greek
- (5) Italian
- (6) Spanish
- (7) German (East)
- (8) Immigrant
- (9) No answer

Waves: E and L

Comment: Foreign language version of the household questionnaire

1.3 Year of birth

The “year of birth” of a child is included in all wave-specific datasets. However, from 1984 until 1988 the variable was named \$KGEBURT. Since 1989 a child’s birthyear can be found under \$KGJAHR. From 1984 until 1999 the information of “year of birth” was given by a **2-digit** number. Since 2000 (**wave Q**) “year of birth” of the child is stored as **4-digit** number.

1.3.1 \$KGJAHR

Var label: **year of birth**

Waves: D-P

Comment: Year of birth of the child (2-digit). Change in variable name because of addition of a variable on month of birth (variable \$KGMONAT) in 1987 (wave D). The value of \$KGJAHR can in some cases diverge from the longitudinally tested data in the central file PPFAD (variable **GEBJAHR**)

Var label: **year of birth**

Waves: Q-BC

Comment: Year of birth of the child (4-digit). The value of \$KGJAHR can in some cases diverge from the longitudinally tested data in the central file PPFAD (variable **GEBJAHR**)

1.3.2 \$KGEBURT

Note this variable changed its name in 1987 to \$KGJAHR in \$KIND.

Var label: **year of birth**

Waves: A-C

Comment: Year of birth of child (2-digit). The value of \$KGEBURT can in some cases diverge from the longitudinally tested data in the central file PPFAD (variable **GEBJAHR**)

1.4 Month of birth

The “month of birth” of a child is only included in the datasets of 1987 (wave D) and of 2003 (wave T). Information on a child’s month of birth can be derived from the central file PPFAD (variable **GEBMONAT**).

1.4.1 \$KGMONAT

Note this variable is only included in 1987 and 2003 in \$KIND.

Month of birth is saved as variable **GEBMONAT** in the file PPFAD.

Var label: **month of birth**

Waves: D and T

Comment: Month of birth of child was surveyed in 1987 and 2003 in the household questionnaire.

1.5 Gender/Relationship to household head

This section summarizes a child's gender $\$KSEX$ and his/her relationship to the household head $\$KSTELL$. A child's sex can in some cases diverge from the longitudinally tested data in **PPFAD** (variable **SEX**). The information stored in $\$KSTELL$ is simply a copy of the variable $\$STELL$ in the wave-specific file $\$PBRUTTO$.

1.5.1 \$KSEX

Var label: **sex**

Value label:

- (1) male
- (2) female

Waves: A-BC

Comment: Child's sex. The value of $\$KSEX$ can in some cases diverge from the longitudinally tested data in the central file PPFAD (variable SEX).

1.5.2 \$KSTELL(wave A-BB)

Var label: **relationship of child to household head (HH)**

Value label:

- (1) spouse of HH
- (2) partner of HH
- (3) son/daughter of HH
- (4) foster child of HH
- (5) son/daughter-in-law of HH
- (6) father/mother of HH
- (7) father/mother-in-law of HH
- (8) brother/sister of HH
- (9) grandchild of HH
- (10) other relative of HH
- (11) not related to HH
- (12) child of the partner of HH**

Waves: A-BB

Comment: Copy of the variable $\$STELL$ in the wave-specific file $\$PBRUTTO$. The values **(1)** and **(2)** as well as **(5)** - **(7)** are by definition not saved in the file \$KIND. Please note that since **1998 (wave O)** the additional code **(12)** was included in $\$STELL$ and thus also in $\$KSTELL$.

1.5.3 \$KSTELL(*wave BC*)

Var label: **relationship of child to household head (HH)**

Value label:

- (21) son/daughter
- (22) stepchild (child of the partner)
- (23) adoptive child
- (24) foster child
- (25) grandchild
- (26) great-grandchild
- (41) brother/sister
- (62) niece/nephew

Waves: BC

Comment: Copy of the variable **\$STELL** in the wave-specific file **\$PBRUTTO**.

1.6 Household affiliation

The variable **\$KINHH** is a copy of the variable **\$PZUG** in the wave-specific file **\$PBRUTTO**. This variable changed between 1988 (*wave E*) and 1989 (*wave F*). Additional value labels were included in **\$PZUG**.

1.6.1 \$KINHH (*wave A-E*)

Var label: **household affiliation**

Value label:

- (0) still lives in household (HH)
- (1) not in HH due to military/community service
- (2) not in HH due to training, college
- (3) not in HH due to job
- (4) not in HH due to hospital stay
- (5) not in HH due to vacation
- (6) not in HH due to other reasons
- (7) deceased
- (8) moved out
- (9) possibly misclassified
- (11) born
- (12) moved into HH from within Germany
- (13) moved into HH from foreign country
- (14) returned to HH
- (15) moved into HH from within Germany prior to last survey
- (16) moved into HH from foreign country prior to last survey
- (17) born before las survey
- (19) no answer
- (20) lives in new HH
- (21) not in HH due to military/community service
- (22) not in HH due to training, college
- (23) not in HH due to job
- (24) not in HH due to hospital stay
- (25) not in HH due to vacation
- (26) not in HH due to other reasons
- (27) deceased
- (28) moved out
- (30) lives in HH since last 19XX
- (31) moved into HH from within Germany since 19XX
- (32) moved into HH from foreign country since 19XX
- (33) born 19XX
- (39) no answer
- (40) now living in HH
- (99) no info on current HH affiliation

Waves: A-E

Comment: Copy of the variable **\$PZUG** in the wave-specific file **\$PBRUTTO**.

1.6.2 \$KINHH (*wave F-BB*)

Var label: **household affiliation**

Value label:

- (0) still lives in household (HH)
- (1) not in HH due to military/community service
- (2) not in HH due to training, college
- (3) not in HH due to job
- (4) not in HH due to hospital stay
- (5) not in HH due to vacation
- (6) not in HH due to other reasons
- (7) deceased
- (8) moved out
- (9) possibly misclassified
- (11) born
- (12) moved into HH from within Germany / **moved from within West Germany since last survey (since wave I)**
- (13) moved into HH from foreign country last survey / **moved from foreign country since last survey (since wave I)**
- (14) returned to HH
- (15) moved into HH from within Germany prior to last survey
- (16) moved into HH from foreign country prior to last survey
- (17) born before las survey
- (18) moved from former GDR**
- (19) no answer
- (20) lives in new HH
- (21) not in HH due to military/community service
- (22) not in HH due to training, college
- (23) not in HH due to job
- (24) not in HH due to hospital stay
- (25) not in HH due to vacation
- (26) not in HH due to other reasons
- (27) deceased
- (28) moved out

\$KINHH (wave F-BB) contd.

Var label: **household affiliation**

Value label:

- (30) lives in HH for a long time
- (31) born last year
- (32) moved into HH from within Germany last year / moved from within West Germany since January of the previous year
- (33) moved into HH from foreign country last year / moved from within foreign country since January of the previous year
- (38) moved from former GDR since January of the previous year
- (39) no answer
- (40) now living in HH
- (41) not in HH due to military/community service
- (42) not in HH due to training, college
- (43) not in HH due to job
- (44) not in HH due to hospital staay
- (45) not in HH due to vacation
- (46) not in HH due to other reasons
- (47) deceased
- (48) moved
- (99) no info on current HH affiliation

Waves: F-BC

Comment: Copy of the variable \$PZUG in the wave-specific file \$PBRUTTO.

1.7 Household size/Number of children

The variable **\$HHGR** is simply a copy of the variable *\$HHGR* in the wave-specific file **\$HBRUTTO**. Based on *\$HHGR* for each child in \$KIND the variable **\$KZAHL** provides the total number of children up to age 16 living in the current household.

1.7.1 \$HHGR

Var label: **number of persons in household**

Waves: A-BC

Comment: Copy of the variable *\$HHGR* in the wave-specific file \$HBRUTTO.

1.7.2 \$KZAHL

Var label: number of children up to 16 in household

Waves: A-BC

Comment: For each child in \$KIND, the variable \$KZAHL provides the total number of children up to age 16 in the current household.

1.8 Pointer

The pointers provided in **\$KIND** comprise **PERSNR** of the household head of the child **\$KHV**, the partner of the household head **\$KHVP**, the mother of the child **\$KMUTTI**, and the partner of the mother **\$KMUP**. The first two pointers **\$KHV** and **\$KHVP** are identified using the codes (0) and (1)/(2) of **\$STELL** in the wave-specific file **\$PBRUTTO**. After extensive testing of the distribution of the data up to that point, the pointers to mother (variable **\$KMUTTI**) and mother's partner (variable **\$KMUP**) were revised in July 1994 for SOEP waves A (1984) to J (1993), since in some cases these variables showed a very high percentage of missings. The identifiers linking the **PERSNR** of a child's mother to each child in **\$KIND**, are based on the variables **\$STELL**, **PARTNR\$\$** in the wave-specific file **\$PGEN** and if possible information from the files **BIOBIRTH** or **BIOAGE01**. More information on **\$KMUTTI** is included in the comment section of **\$KMUTTI**.

1.8.1 \$KHV

Var label: **pointer to household head**

Waves: A-BC

Comment: **PERSNR** of the HH head, i.e. person with **\$STELL=0** in the wave-specific file **\$PBRUTTO**.

1.8.2 \$KHVP

Var label: **pointer to partner of household head**

Waves: A-BC

Comment: **PERSNR** of the partner of the household head. It is defined by combining the variables **\$STELL** (relationship to household head) in the wave-specific file **\$PBRUTTO** and the information of **PARTNR\$\$** in the wave-specific file **\$PGEN**. The partner information of **PARTNR\$\$** is only taken into account when an individual provided the information.

1.8.3 \$KMUTTI

Var label: **pointer to mother**

Waves: A-BC

Comment: **PERSNR** of a child's mother. After extensive testing of the distribution of the data up to that point, the pointers to mother (variable \$KMUTTI) and mother's partner (variable \$KMUP) were revised in July 1994 for SOEP waves A (1984) to J (1993), since in some cases these variables showed a very high percentage of missings. The procedure for generating the pointers was modified to define the mother-child relationship as a combination of the variables \$STELL (=relationship to household head) and PARTNR\$\$ (=person ID number of spouse or partner). The information of PARTNR\$\$ in the wave-specific file \$PGEN is only available when an interview took place with the partner. If this data is lacking the combination of relationship to household head of the mother and of the mother's partner is used. In this context, for waves A to J, the newly generated pointers were tested longitudinally over time for consistency. While it is quite realistic that a mother would change partners over time, (e.g., second marriage after partner's death, or separation from partner), it seems less plausible that there would be pointers to different mothers for the different survey years. According to a strictly biological definition of motherhood, this would certainly not be possible, but according to a social definition of motherhood, it would be possible to have a new "social" mother after the biological mother dies or moves out. This problem is quantitatively insignificant, however (e.g., a changing mother pointer was only identified for 29 children from wave A to J). Further information on the definition of *social/biological* mother-child relationships in the SOEP can be found in the *BIO documentation* for the file **BIOBIRTH**.

1.8.4 \$KMUP

Var label: **pointer to partner of mother**

Waves: A-BC

Comment: **PERSNR** of the partner of a child's mother based on **PARTNR\$\$** of the mother in the person-related file \$PGEN. Please see also the description of **\$KMUTTI**.

1.9 Institutional care

In wave Z (2009) the question on school attendance no longer comprises an item on **kindergarten, creche, and nursery**. Up to and including wave Y (2008) there is only a single variable summarizing the information on whether a child does not attend “general school” or “kindergarten, creche, and nursery”. In wave Z (2009) the question on school attendance and attendance of day care institutions was divided into two specific questions. Due to this split of items, the variable containing the information “none of these institutions” changed as well.

\$K + wave-specific question number e.g *BAK6502*

Var label: **none of these schools**

Waves: Z-BC

Comment: Up to and including wave Y (2008) there is only one single variable summarizing the information on whether a child does not attend “general school” or “kindergarten, creche, and nursery”. In wave Z (2009) this item comprises only information on “no school attended”. This excludes the information whether a child does or does not attend a “kindergarten, creche, and nursery”. **Please see table below for a synopsis of all respective variables collected in waves A-BB.**

\$K + wave-specific question number, e.g *BAK6701*

Var label: **kindergarten, creche, and nursery**

Waves: Z-BC

Comment: Up to wave Y (2008) this information was coded as a separate item “kindergarten, creche, and nursery” in the general school variable. Code **(2)** of the new variable on “kindergarten, creche, and nursery” since wave Z (2009) contains information that “none of these institutions are attended”.

1.10 Costs

In wave BA (2010) a new instrument was introduced within the household questionnaire regarding children up to age 16: **How much do the above mentioned school, care and activities cost you?**. Parents indicate average monthly cost of their children regarding school, care, and (leisure) activities, e.g., early music education ,sports, etc.. Since the questions regarding “activities” are surveyed every two years, the costs are also only available every other year. Yet, with wave BB (2011) another aspect of monthly costs was surveyed: **How much do the above mentioned care arrangements outside the household cost?**.

1.10.1 school, care, and activities

\$K + wave-specific question number, e.g *BAK7001*

Var label: **average monthly cost**

Waves: BA and BC

Comment: In wave BA (2010) average monthly costs were surveyed: **How much do the above mentioned school, care and activities cost you?**. Parents indicate average monthly cost of their children regarding school, care, and (leisure) activities, e.g., early music education, sports, etc.. **Please see table below for a synopsis of all respective variables collected in waves A-BC.**

\$K + wave-specific question number, e.g *BAK7002*

Var label: **no costs**

Waves: BA and BC

Comment: Corresponding to parents' estimation of average monthly costs “no costs” indicates if parents do not have any costs.

1.10.2 additional care outside the household

\$K + wave-specific question number, e.g *BBK7201*

Var label: **average monthly cost**

Waves: BB

Comment: In wave BB (2011) another aspect of monthly costs were surveyed: **How much do the above mentioned care arrangements outside the household cost?**. Parents indicate average monthly cost of their children regarding additional care outside the household, e.g., relatives, friends, neighbors, etc.. **Please see table below for a synopsis of all respective variables collected in waves A-BC.**

\$K + wave-specific question number, e.g *BBK7202*

Var label: **no costs**

Waves: BB

Comment: Corresponding to parents' estimation of average monthly costs “no costs” indicates if parents do not have any costs.

Tables

Please note that the variables in the tables are sorted according to topics and that some have been modified in the course of time. Additional information on longitudinal consistency of the variables included in the wave-specific files \$KIND is provided by the documentation of **KIDLONG - the longitudinal data set on children up to age 16 within the household**.

Table 1: Variable Overview (1984-1989)
